I at once made application to the most skillful physicians in the country, but receiving no assurance from them that my hair could again be restored, I was forced to become reconciled to my fate until, fortunately, in the latter part of the year 1857, your Restorative was recommended to me by a druggist, as being the most reliable Hair Restorative in use. I tried one bottle, and found to my great satisfaction that it was producing the desired effect. Maguinatory—Town of Keaner.

Office and Depot—No. 85 St. Charles Street, basement Masonic Hall, New Orleans.

THESE MILLS are of Southern manofacture as well as of Southern invention, and have never failed to take the First Premium over all other mills, wherever exhibited. At the late State Fair held at Jackson, Mississippi, one of these mills was exhibited, (size 16 inches diameter of stone) and Grand one bushel of corn into fine meal in one minute and forty-five seconds!

Pronounced by the committee to be the coolers meal ever coming from a mill.

This decision awarded the first premium to the Coleman Mill.

These mills are now so firmly established in public estimation, that it is unnecessary to mention particularly their good qualities of simplicity of construction, facility of being attached to asy kind of power, and the wonderful quantity of excellent meal they turn out when properly put up.

one of Heavens best mercies to offending man!—
Instances could be produced of its effects, which
would stagger credulity.

The nauseous preparations heretofore used have
failed; but this has never in one instance been
known to fail. Happily for mankind, the Governor
of the world is a Father who afflicts, not to kill, but
to cure!

In mercy he has appointed Medicines for these dreadful diseases, which when taken, quickly flies to all parts of the system, attacks the disease at every post and with a fidelity and courage truly admirable, never gives it rest until it has completely expelled it from the body, and restores the unfortunate patient to former health and vigor.

This 'Remedy' strikes at the very root of the disease; its tendency is not simply to suspend the poison, but to remove the cause on which it depends.

And what ENHANCKS ITS VALUE, is the entire absence of all neuserou tests or small; it can entire absence of all nameous tasts or smell: It can lay in the counting room, or on the toilet table, without ever being suspected as a 'Remedy' for se-
